

Development Bank of the Philippines

November 14, 2016

MS. CHERRY MAE L. LIMBACO

Schools Division Superintendent
Division of Misamis Oriental, Region X
Department of Education
Cagayan de Oro City

Dear Madam:

Greetings from the Development Bank of the Philippines!

We are pleased to inform you that DBP will be implementing EMV Chip Cards as mandated by the Bangko Sentral ng Pilipinas for all banks to comply by January 2017.

EMV stands for "Europay, Mastercard and Visa" – the original developers of EMV. It is the new global standard for credit and debit card payments. It involves the use of cards equipped with a microprocessor chip that store and protect cardholder information.

This new technology makes it harder for anyone to steal the account information when making a card transaction. With EMV cards, rest assured that every transaction made is secure.

The DBP EMV Chip Card is accepted for over-the-counter purchases, shop at retail stores, dine at restaurants, do these and more without having to withdraw cash from the ATM.

The DBP EMV Chip Card may also be used in over 30 million in-store and online merchants, and 1 million ATMs worldwide.

The DBP EMV Chip Card comes with a quick reference guide containing its features and functionalities.

DBP Capistrano Branch will inform and coordinate with your HR Department or pertinent officer for the schedule of the release and distribution of the new DBP EMV Chip Cards.

Should you need further clarifications, you may reach your designated Branch contact person or undersign at telephone # (088) 856-7776.

The Development Bank of the Philippines is fully committed to deliver the products and services you truly deserve.

Sincerely,

ANGELITA T. AGUIHOB
Branch Head
DBP Capistrano Branch

WELCOME THE NEW DBP EMV CHIP CARD!

Please be informed that DBP will be implementing EMV chip cards as mandated by the BSP for all banks to comply by January, 2017. EMV stands for "Europay, MasterCard, and Visa." It is the new global standard for credit and debit card payments. It involves the use of cards equipped with a microprocessor chip that store and protect cardholder information.

Starting January 1, 2017 customers who continue to use non-EMV cards do so at their own risk. The bank will not be responsible for any fraud committed on non-EMV cards.

Please wait for notification (via letter, e-mail, SMS or branch poster) when your card is available.
