Memorandum

To: Public Schools District Supervisors

From:  **CHERRY MAE L. LIMBACO, Ph.D., CESO V**
Schools Division Superintendent

Date: August 5, 2013

Subject: **Organization of Fluoride Patrol**

Misamis Oriental is the pioneer in the implementation of Essential Health Care Program (EHCP) and it has been adapted by other divisions in the country. Most elementary schools and some high schools are recipient of SBRMS funds for the construction of handwashing / toothbrushing facilities to promote toothbrushing and handwashing activities in the schools. The teachers are expected to be the frontliners of the implementation but due to the multi tasks of teachers, the programs are not given much attention.

To unload the teachers of too much responsibilities, you are hereby advised to organize **Fluoride Patrol** in all schools of your respective districts. Fluoride Patrol Handbook shall be given in all schools for information and guidance.

For strict compliance.
